DOMINATOR

The Shipyard where luxury takes shape

Dominator is not just shape, beauty and luxury but also, and indeed most importantly, substance. We are skilled in responding to the needs of our clients, who consider yachting one of life's pleasures, rather than a fashion trend.

Each model is designed and produced through the close working relationship between a team of international top-designers and the shipyard's technical office which covers all the engineering features of the yacht development and building process.

The Dominator philosophy is to design and build bespoke yachts. Owners can make their yachts unique, in keeping with their way of understanding and experiencing the sea.

This is possible by means of special technical and furnishing solutions, and the use of valuable materials and top quality finishes, enabling the shipyard to satisfy an extensive range of different expectations and demands.

Italian styling and design are combined with Dominator's custom-made spirit and the soundness and reliability of the yachts: an incomparable match.
